POOL RESTORATION INSIGHTS

POOL PLASTER AND PAINT REMOVAL

➤ A business owner in Kentucky used DUSTLESS BLASTING® equipment to remove several layers of paint and plaster from an apartment complex pool in need of resurfacing. The contractor was also responsible for cleaning up after the job so that the plaster company could immediately resurface the pool.

TECHNICAL SPECS

JOB LENGTH: 10.5 hours	ABRASIVE MEDIA: 36 bags of crushed glass
NOZZLE TYPE: XL Performance Size: #6	JOB SIZE: 1800 SQ FT
EQUIPMENT: DB800® Mobile XL	BLASTING METHOD: 100% dry

Crushed glass was the ideal abrasive choice, for its low cost, angular shape, and environmentally inert characteristics.

The XL Performance nozzle increases abrasive particle velocity, resulting in improved production rates. It was a great choice for this large pool with multiple layers of paint. It allowed the contractor to use a larger standoff distance, covering more ground in less time.
